The objective of the Gym Management System is to provide a system which handles the information of the people coming into the gym and maintaining their health. It takes care of all their health information through schedule management. It even maintains the data of what and all medicines used by the people who join the gym through schedule management. Data will be stored in the database.

Gym Management System allows the user to store the health, schedule and other details, the details of person who is in the gym, gym equipment details etc. This software package allows storing the details of all the data related to gymnasium. The system is strong enough to withstand regressive yearly operations under conditions where the database is maintained and cleared over a certain time of span. The implementation of the system in the organization will considerably reduce data entry, time and also provide readily calculated reports.
